User Research & Needs Analysis

Basic Questions

1. What is your age group? (Single choice)

- A. Under 18
- B. 18–25
- C. 26–35
- D. 36 or above

2. How often do you feel significant anxiety or stress in your daily study/work? (Single choice)

- A. Hardly ever
- B. Occasionally (1–2 times per week)
- C. Often (almost every day)
- D. Constantly under high pressure

A. Stress Regulation Scenarios

1. When you feel nervous or anxious, what is usually your first reaction? (Multiple choice)

- Rapid breathing
- Hands unconsciously tense up
- Want to repeatedly touch/squeeze things
- Shoulders and neck become tense
- Increased heart rate
- Want to calm down without being disturbed
- Other: _____

2. In which situations do you most wish to quickly calm yourself? (Multiple choice)

- During study or work
- Before a meeting or presentation
- Before socializing
- Before sleeping
- When alone
- In public spaces
- Other: _____

3. What methods do you usually use to help relieve stress? (Multiple choice)

- Deep breathing

- Massaging/squeezing your hands or fingers
- Squeezing a stress relief toy
- Walking around
- Browsing on your phone
- Listening to music
- Closing your eyes to rest
- Talking to someone
- Other: _____

4. Among these methods, which do you use most often and why?

Open-ended

B. Squeezing Interaction & Tactile Needs

5. When you are nervous, do you unconsciously press, squeeze, or rub an object? (Single choice)

- Often
- Occasionally
- Rarely
- Never

6. If you have an object that can be squeezed repeatedly, what tactile qualities would make you more willing to keep using it? (Multiple choice)

- Soft
- Slight resistance
- Easy to press down
- Clearly deforms when pressed
- Rebounds quickly
- Rebounds slowly
- Stable tactile feel
- Each squeeze feels responsive
- Other: _____

7. Which of the following states best matches the squeezing experience you want? (Single choice)

- A slight squeeze causes a noticeable change
- Requires some force but gives a more solid feedback
- Starts soft, then offers more support as you squeeze
- I'm not sure

8. Which rebound manner do you prefer? (Single choice)

- Immediately returns to original shape after release
- Recovers slightly slower after release
- Recovers with a “breathing” feel after release
- No preference

9. What is the most important quality of a relaxation squeeze object for you?

Open-ended

C. Feedback Preferences

10. When you make a squeezing motion, do you want the system to give feedback? (Single choice)

- Yes
- It depends
- No

11. If there is feedback, which forms do you prefer? (Multiple choice)

- Visual changes
- Haptic changes
- Auditory changes
- Simple text prompts
- No obvious feedback needed

12. How would you prefer the feedback to respond to your actions? (Single choice)

- Immediate synchronized change
- Slightly delayed but smoother and more natural
- First follow me, then gradually form its own rhythm
- I don't mind

13. What kinds of visual changes make you feel more relaxed? (Multiple choice)

- Slow changes
- Continuous transitions
- Circular shapes or curves
- Soft edges
- Gradual light–dark changes
- Breathing rhythm
- Lots of white space
- Non-glare colors
- Other: _____

14. What kinds of visual changes make you feel tense or irritable? (Multiple choice)

- Sudden jumps
- Flickering
- Excessive contrast
- Colors that are too bright
- Shapes that are too sharp
- Too many elements
- Too fast a rhythm
- Other: _____

D. Psychological Experience Needs

15. When you want to calm yourself, which feeling do you most hope to obtain? (Multiple choice)

- To feel soothed
- To have a rhythm to follow
- To feel in control
- To feel responded to
- To have your attention gently shifted
- To feel your body slowly relax
- To not be noticed by others
- Other: _____

16. Which of the following statements is closer to your thinking? (Single choice)

- I hope the system follows my movements
- I hope the system gives me a rhythm and I follow it
- A combination of both is best

17. If a system can change in real time with your squeezing, would you more easily feel that you are actively regulating your state? (7-point scale)

Rating: 1 = completely disagree, 7 = completely agree

18. What would make you willing to continue using a stress-relief interaction method?

Open-ended

19. What would make you not want to continue using it?

Open-ended
